DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Haneda et al. (US 6,957,273).

In regard to claim 1, Haneda et al. disclosed a method for providing error recovery in a data processing system which transfer message packets through communication adapters present on each end of a switched link and connected to respective data processing nodes, said method comprising the steps of:

Detecting corruption of a message packet transferred over said link (*error detection performed by packet transmitting/receiving unit, fig. 4, 28-4, col. 9 lines 37-59*);

Storing information concerning said corruption in a table (*error log, col. 9 lines 61-67*) within said adapter (*PCI bridge module request error log, col. 9 lines 61-67*); and

Interrogating said table from the node to which said adapter is connected (*PCI bridge module request error log, col. 9 lines 61-67*).

Conclusion

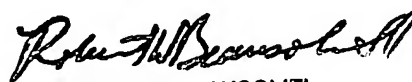

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892.
